

I am an amateur developer. I have prior professional coding experience developing Android-based applications using Java. I don't have any professional experience as a web developer; however, I intend to master my web development skills. This unit will help me understand and shape my portfolio as a web developer.

JavaScript is new to me, but I do have some hands-on experience in using JavaScript, as it was first introduced to me in my last trimester in SIT774 – Web Technologies and Development.

For now, I am targeting the "Credit" grade for this unit. However, I might go for the "Distinction" grade as well.
